

Information for teachers

Create-a-trail

This trail was designed to allow pupils to creatively discover **Explore@Bristol**. It will help them develop imaginative scientific ideas and focus their visit.

Please download this sheet and use it however you wish. We would suggest using two sheets per group, one for answers and one to give to another team.

Pupils should work in pairs or small groups. It is advisable to pick just one gallery or theme. Give students a set amount of time to wander round and jot down some ideas and questions. Arrange a set meeting place and time where they can swap sheets with another team. At the end the teams can meet up and share answers, ideas and any problems they encountered whilst designing the trails.

Encourage students to think creatively; the last box has been left open so they can use it in any way they wish.
